

Alumawood™ Just Got Tougher . . .

Now with **TEFLON®**
surface protector.

Amerimax's Aluma-ShieldSM coating system for Alumawood™ shade structures has set the standards for toughness and durability for years. Now, it's even tougher with the addition of Teflon® surface protector to provide extended longevity, superior durability and ease of maintenance.

Over a four-year period Amerimax tested and proved the performance of DuPont Teflon® surface protector as an additive for Aluma-ShieldSM. Teflon® surface protector is the next step in keeping Aluma-ShieldSM coatings the right choice for value conscious homeowners.

Amerimax
ALUMAWOOD™

Teflon® coatings are widely used in many items from non-stick pans to stain-resistant carpets and even for equipment used on U.S. space missions. And, it's the new ingredient in the Aluma-ShieldSM coating system.

Products coated in Aluma-ShieldSM with Teflon® surface protector provide homeowners:

- The washability of a semi-gloss finish and decorative appeal of a matte finish
- Surfaces that repel oil, dust, dirt and stains, making them easy to keep clean

Aluma-ShieldSM also provides the following to homeowners:

- Protection from UV and weathering for a long-lasting, beautiful new look
- Products that are resistant to corrosion from sun, salt and pollution
- A durable surface that resists chalking and fading
- A premium coating without the premium price

Amerimax's Aluma-ShieldSM coating system is a proprietary formula that provides excellent long-term gloss retention and corrosion protection. Our products are so tough and durable that we back them with one of the strongest product warranties in the business. But any warranty is only as good as the company behind it. That's why, when you choose Alumawood™ shade structures, you receive a limited lifetime warranty backed by Amerimax Building Products, Inc.

TEFLON® is a registered Trademark of DuPont used under license by AMERIMAX BUILDING PRODUCTS, INC.
