Quality, Beauty, and Durability

Continuing our tradition of excellence, superior quality, and innovation, Amerimax offers the Maxx Panel™ insulated roof system to complement our Alumawood® patio cover offering.

The Maxx Panel™ insulated roof system utilizes an internal locking system specifically engineered to increase performance and strength. In addition, the patented locking system reduces the amount of labor required to install and maintain the product.

Features and Benefits

- **Easy-to-install locking system** - Easily snaps together during installation and increases strength and performance.
- **Painted aluminum embossed finish with 8" Plank Design** - This durable dual layer system provides a superior finish that resists scratches, corrosion and fading. It also requires less maintenance than most other finishes.

www.try-tech.com

- **Integrated Aluminum Fan Beam** - Made of extruded aluminum and is surrounded on all sides by foam for better lamination and to reduce telegraphing.
- **Cedar embossed texture** - Provides an aesthetically pleasing natural wood appearance with low maintenance requirements. (Available in standard and plank appearance.)
- **High-density structural roof thermal foam** - Specially formulated Expanded Polystyrene (EPS) core provides exceptional thermal insulation and strength.
- **Aluminum extruded gutter system** - A thicker grade gutter system that provides superior life and performance. (Optional leaf guard available.)
- **Laminated panel technology** - Provides a panel with superior strength and resistance to weathering.
- **Color options** - Available in White and Desert Sand to accentuate your outdoor living space.
